Overview of Activities Prioritised under Integrated Social Services

Reducing poverty and vulnerability requires that the needs of children and families are met across multiple dimensions. The government aims to ensure its people benefit from multiple services and programmes, and that access to these programmes is equitable so that **no one is left behind.**

Various programmes and services such as LEAP, the NHIS, GHS/CHPS and Social Welfare have produced important results and continue to improve and develop. Nonetheless, in a context of limited resources and increasing decentralisation, an important and urgent question is how these programs can **most effectively work together.**

Every community and every district is unique, and has unique challenges and opportunities. The Integrated Social Services Initiative, over the period of 2020 and 2021 in 60 MMDAs in all 16 regions of Ghana, wants to learn from these, to promote best practices, learn from difficulties, and **apply lessons both at the national and local level.**
